FOR IMMEDIATE RELEASE – December 12, 2016

**MEMREG, INC. ENHANCES OTC MARKET PROFILE
WITH FAST/DWAC ELIGIBILITY**

Phoenix, Arizona, December 12, 2016 -- (OTC Markets News Service). MemReg, Inc. (OTC:MREG) (the “Company”) announced today that the Depository Trust Company (“DTC”) has approved the Company’s common stock for FAST/DWAC transfer. The Company’s common stock CUSIP number is 58626C105.

The DTC’s Deposit and Withdrawal at Custodian (“DWAC”) service provides participants with the ability to make electronic book-entry deposits and withdrawals of eligible securities into and out of their DTC book-entry accounts using the Fast Automated Securities Transfer service (“FAST”). With the Company’s transfer agent as the distribution point, the FAST system eliminates the movement of physical securities certificates for the transfers of securities registered in the name of DTC’s nominee, Cede & Co, on the transfer agent’s books. DTC and its FAST transfer agents reconcile the results of participants’ deposit and withdrawal activities electronically on a daily basis. This newly approved stock transfer capability will enable the Company’s shareholders to transfer their shares of MREG stock electronically without the extra expense and delay associated with the processing and transfer of physical share certificates.

Colt Melby, the Company’s CEO, said “This initiative will provide increased service and flexibility for our shareholders and bring greater efficiency to our investors. We believe this is an important step for the Company to build liquidity for its current shareholders and will enable us to continue to expand our shareholder base.”

Neither Computershare Trust Company, N.A., the Company’s transfer agent, or the DTC® has approved nor disapproved the contents of this press release and they accept no responsibility for the adequacy or accuracy of this release.

About the Company. On June, 30, 2016, the Company acquired all the assets of ORhub, LLC (“ORhub”). The assets acquired included the ORhub software, a platform for the tracking and management of medical devices and supplies, primarily in implant orthopedic surgeries. The Company is initially focusing on spinal implant surgeries. On October 6, 2016, the Company announced its production version was being used exclusively by a major regional hospital in California. The Company estimates that annually there are 7,000,000 implant based orthopedic and other surgeries that could use the ORhub platform and that this number is growing at 6% a year. The Company’s mission is to create a new healthcare IT vertical-specific software category known as Surgical Resource Management. The Company believes it can create, as a

byproduct of immediately realized productivity benefits, the world's largest source of intelligent surgical information – a suite of products to better serve the needs of the healthcare industry, patients, and the government. The ORhub product is anticipated to enable hospital and vendor cost reductions, enhance accountability, automate implant registries, create real-time advanced analytics, and improve compliance with insurance and government requirements.

More information on the Company's business, product and the management team can be found on the Company's website at www.orhub.com. The Company currently trades on the Pink Sheets-Current Information Tier under the symbol MREG. Information on the Company, including unaudited financial information is available at OTC Markets under the symbol MREG.

MemReg's office is located at 9830 S. 51st Street, Suite A-128, Phoenix, AZ 85044.

Forward Looking Statements. This news release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Although the Company believes the expectations reflected in any forward-looking statements are based on reasonable assumptions, it can give no assurances that its expectations will be attained. Such statements are inherently uncertain, and actual results and activities may differ materially from those estimated or projected. Certain factors that can affect the Company's ability to achieve its anticipated results include, among others, uncertainties inherent in the development of a new software product business.
